

## Scroll Saw

### •Review dress code

-Remind students that long hair must be tied back, loose clothing and/or jewelry must be removed

### •Intro

-Describe tool strengths and how it works:

-Great for tight curvy cuts on thin material

-Blade moves up and down ie: is a reciprocating type saw

-Show power switch and warn students that it may be easy to accidentally hit it while setting up tool

### •Cutting edges or holes

-You can cut an edge or in the middle of material

-If you need to cut a hole out, drill a hole and thread the blade, show them

-Show blade tension lever

-Show how to secure the blade on the top and bottom making sure teeth are pointed down and then apply tension

-Show how to change table angle

-Demonstrate on/off and speed adjustments

-Demonstrate how to adjust the guide/hold-down foot to the top of material to keep it from rattling/moving up and down

### •Demonstrate Practice Piece

-Demonstrate a cut, show firm hold and stance

### •Field Questions before Students make cuts

-If you are not sure about your material or the cut you're trying to make, please ask.

**REMEMBER- We are here to help. If you have any questions ask!**
